

DESIGNED AND MADE FOR OUR UNIQUE CONDITIONS

Saxon sets the standard in wood heating technology. The firebox, the heart of all Saxon heaters, offers strength of 8mm thick steel which maintains the thermal efficiency second to none. State of the art low emission technology combined with style and ease of use. The Saxon heater range is truly a better choice.

THE SAXON SYSTEM EXPLAINED

THE FIRE THAT BURNS CLEAN

Saxon has developed the ultimate low emissions with a unique utilisation of air flow into the firebox. Not only does the wood burn, but the carbon rich gases emitted burn as well! Virtually no smoke or other gases are released, just clean warm air that spreads throughout your home for maximum comfort.

CHOOSING THE RIGHT FLUE SYSTEM FOR YOUR HEATER

Choosing the right flue system is as important as the choice of wood heating appliance. To extract maximum performance from your Saxon wood heater we strongly recommend the use of a Maxiheat flue system. Maxiheat flue systems are designed, tested and are in accordance with Australian Standard AS2918. Maxiheat flue systems and components are manufactured to high standards from quality materials. Maxiheat has manufactured flue systems for over 15 years and are the market leader in flue technology.

SAXON WOOD HEATERS, BUILT TO GO THE DISTANCE

Conquer the Cold, Winter after Winter with a Saxon

The Saxon range of wood heaters is a result of over twenty five years of practical development and commitment to long lasting quality with simple but efficient operation, maintaining a high level of comfort that we associate with a wood fire.

We have developed a highly efficient burning technology, based around simple controls, enabling you to achieve long burn times whilst still maintaining a truly efficient level of combustion.

15
YEAR
FIREBOX
WARRANTY

Saxon wood heaters are designed for colder climates, hence our renowned 8mm thick steel firebox design that comes with a fifteen year warranty.

The Saxon range of wood heaters are all built with sturdy, smart looking bodies, large door openings and big glass doors for you to experience the best view of your Saxon wood fire hard at work.

Saxon wood heaters have been tested by an independent testing laboratory and comply with the following Australian standards, A.S. 4013 particulate emission, A.S. 4012 power and efficiency.

Combustion rates are easily adjusted so your Saxon heater can safely continue all night without more logs, so you can wake up in the morning to a home that's still cosy.

Firebox door security with tough ceramic glass that is self-cleaning as a result of the superior air flow design.

BLACKWOOD

The Blackwood, like the rest of the Saxon range, features the Saxon 8mm Steel Firebox - the heaviest firebox available in Australia. Designed to suit the harsh and extreme conditions of a Tasmanian winter, the Blackwood is one of Australia's most popular wood heaters. The Blackwood is capable of heating up to 250m² (25 squares) and includes a three speed fan to circulate the warm air around your home.

APPLIANCE PARTICULATE EMISSION FACTOR	1.6g/kg
OVERALL AVERAGE EFFICIENCY	61%

WALNUT

What the Walnut lacks in size, it makes up for with style and performance. The Walnut provides efficient heating for small to medium sized homes or supplementary heating in larger homes. This is the perfect unit for heating up to 170m² (17 squares), and includes a standard three speed fan.

APPLIANCE PARTICULATE EMISSION FACTOR	2.3g/kg
OVERALL AVERAGE EFFICIENCY	56%

ROSEWOOD

The Rosewood is a beautifully finished heater with a style that will grace the most modern homes while not looking out of place in more traditional settings. The large bay window enhances radiant heat and the view of the fire. The Rosewood is ideal for heating areas up to 250m² (25 squares), and includes a standard three speed fan.

APPLIANCE PARTICULATE EMISSION FACTOR	1.9g/kg
OVERALL AVERAGE EFFICIENCY	55%

BLACKWOOD INBUILT

The Blackwood Inbuilt is the ideal heater for that little used open fireplace, transforming it back into a focal point that will generate heat throughout the home. You still get the hypnotic effect of an open fire without the mess while heat escapes into the room and not up the chimney. The Blackwood Inbuilt is suitable for heating areas up to 230m² (23 squares). Standard three speed fan included.

APPLIANCE PARTICULATE EMISSION FACTOR	1.6g/kg
---------------------------------------	---------

MAHOGANY (MKII)

The Mahogany is our largest, most powerful freestanding wood heater and the perfect way to stay warm this winter. Featuring the Saxon 8mm firebox, Automated cut-off three speed factory fitted fan, large door opening and big viewing glass making the Mahogany ideal for heating homes up to 350m² (35 squares).

APPLIANCE PARTICULATE EMISSION FACTOR	1.4g/kg
OVERALL AVERAGE EFFICIENCY	64%

ENVIRONMENTALLY EFFICIENT

Saxon wood heaters are proudly Australian owned and designed. At Saxon wood heaters we understand the need to consider our use of natural resources and the effect we have on the environment. Wood as a form of natural energy is the only sustainable and renewable fuel source for heat generation. Wood burning in a Saxon wood heater produces less greenhouse gas than all other domestic heating options. If wood is left to naturally decay, consumed in a bush fire or burnt in a wood heater, it emits similar levels of CO₂. Saxon manufactures slow combustion wood heaters utilising low emission technology to gain maximum heat output with minimum emission into the atmosphere. That's why people are making the right choice for now and the future with the purchase of a Saxon wood heater.
